**Metal Guard 550**

**Product Code: 3800161**  
**Revised Date: 02/19/2013**

### **Metal Guard 550**

**Metal Guard 550** is a viscous, water-displacing, polar-type rust preventive which provides excellent outdoor corrosion protection when compared to most conventional-type rust preventives. It is a high-viscosity liquid, which is applied at room temperature by dipping, spraying or brushing. Special equipment is not required.

**Metal Guard 550** provides a finish that has long-term protection on steel parts during production, indoor and outdoor storage, in shipment as well as a final protective coating.

**Metal Guard 550** is water-displacing and moisture resistant. Because of its characteristics, it will displace wetness or dampness on the metal to which it is applied, leaving a continuous film.

**Metal Guard 550** is also alkaline and acid resistant, which facilitates its use as the final step in finishing operations such as cleaning, pickling, phosphating, black oxidizing, plating, etc.

**Metal Guard 550** applies a heavy, semi-dry film which has self-healing properties and eliminates rust problems caused by scratching and abrasion.

**Metal Guard 550** can be used as received or it can be diluted mineral oil, if necessary.

**Metal Guard 550** can be easily removed with standard organic solvent or alkaline cleaning and degreasing methods.

### **PROTECTION**

Coatings of Metal Guard 550 that are 2 mils or greater in thickness will provide more than 1000 hours of ASTM B-117 salt spray protection.

### **CAUTION**

Read and understand OSHA safety data sheet when working with this product.

**DANGER.....HARMFUL OR FATAL IF SWALLOWED....CONTAINS PETROLEUM DISTILLATES.**

Use with adequate ventilation, and avoid prolonged or repeated contact with skin. If swallowed, do not induce vomiting. Call a physician immediately.
